To reserve a kid we require a \$100 deposit (cash, check, PayPal or Venmo). Kids will not be held without a deposit in hand. Payment in full is expected within two weeks of birth. We reserve the breeders option to not offer a kid for sale if we decide to retain it for our own herd or if we feel the kid is not adequate quality. If the desired kid is not born, deposits will be returned or the option will be given to transfer the deposit to another kid. We reserve the right to purchase 10 straws of semen (at collection cost) from any buck kid sold and collected. No buck kids will be sold out of first freshening dams before evaluation of the dam's udder. Registration applications provided upon completion of purchase.

Herd health is important to us. Our entire herd is CAE tested every winter and remains negative. We will provide the test results upon request and gladly will discuss our kid rearing and CAE prevention protocol.

We request kids be picked up at the farm before 4 weeks of age but we will consider shipping if necessary. Shipping costs (including crate, air fare, interstate health papers, & mileage to and from the airport) are the buyer's expense. Any kids held longer than 4 weeks of age will have an additional \$35/week fee added to their original cost as our milk is needed for cheesemaking in our creamery. Additionally, we will consider lowering the price for kids picked up at the farm by 2 weeks of age. Contact us for details.
